DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims ^{1-18, 21}~~1-28~~, drawn to a composition containing quinazolinone derivative represented by a general formula (in claim 6, 13, 16, 17).

Group II, claims 20 and 23, drawn to a method of treating cardiac fibrosis with said composition.

Group III, claims 19 and 22², drawn to a method of manufacturing a medicament containing said composition.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking groups I-III appears to be that they all relate to a quinazolinone derivative represented by the general formula. However, the claimed compounds (e.g., halofuginone) represented by the general formula are well known in the art ("Halofuginone: An inhibitor of collagen type I synthesis", Granot et al., Bicochim. Biophys. Acta, 1993, 1156(2), 107-12; "Halofuginone, a specific collagen type I inhibitor, reduces anastomotic intimal hyperplasia", Choi et al., Archives of Surgery, 1995,

130/3 (257-261); "Halofuginone inhibits neointimal formation of cultured rat aorta in a concentration-dependent fashion in vitro", Liu et al., Heart and Vessels, 1998, 13/1 (18-23); The Merck Index, Tenth Edition, monograph No. 4479; US 3320124; US 4340596; etc...).

Therefore, the technical feature linking the inventions of groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. A telephone call was made to David O'Brien on December 11, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (703) 308-5377. The examiner can normally be reached Monday through Friday from 8:00am to 4:30pm.
